ACKNOWLEDGEMENT

I express my sincere acknowledgement to the holy sanctum of SHREE SARASWATI SECONDARY SCHOOL for giving us an opportunity to pursue sub-overseer degree in Computer Engineering and thus helping in shaping career.

I would like to take this opportunity to thank all the people who are a part of this OJT in numerous ways, people who gave their unending support right from the state of beginning till the end.

I express my sincere thanks to **Mr. Chhabilal Bhandari**, Principal of Shree Saraswati Secondary School, for providing me the facilities.

I am greatly indebted to our guide **Er. Amit Rajbanshi**, Instructor and Co-ordinator of Computer Engineering department for his valuable suggestions, guidance and encouragement in completion of OJT successfully.

I would like to thank all teaching and non-teaching staffs of Shree Saraswati Secondary School for their immense help and co-operation.

Aakash Neupane

ABSTRACT

Mesh/Canteen is a place in a school where students or teacher get breakfast, lunch, meal, and dinner which is the food hub of any school/college where we get fresh food instead of junk food.

The main aim of any canteen/mess is to provide clean and fresh food to the students/employees of the organization. In many organizations, entire mess management and billing calculations are done manually till date. It is very time consuming and increases the chances of performing calculation mistakes. It would be possible to do the same work within a short period of time and without using many efforts and manpower if there existed a software for the same. Thus, there arises a need to create a software for the same. Such a software would make the entire Mess related management an automated system. The software is not only restricted to food items and their billing manipulations, but handling the information of the cadets seeking training in the PTC is also possible in the software. Thus, such a combination in a single software is of great benefits.
